Love Those Keys

Keys are a favorite toy for babies because they are easy to hold and they make noise when dropped. This sight, sound and motion activity stimulates a baby's senses, helps them develop brain connections and bond with their play partner.

DIRECTIONS

- Hold the keys in your hand and say "One, two, three, let's drop the keys."
- Drop the keys on the floor and be sure your little one watches them drop.
- Put the keys in your baby's hand and repeat. Open your babies fingers and let the keys drop.
- After a few times, your baby will know what to do and will delight in this game.

Safety Tip: Do not use real keys.
